

Shapes Worksheets

Learn to identify and draw basic shapes • Ages 3–5

For Parents

- Start with circle, square, triangle, rectangle.
- Find each shape in the real world: clock = circle, window = rectangle.
- Count sides and corners for each shape.
- Have your child trace shapes before drawing freehand.
- Introduce oval, diamond, hexagon, and star next.

Circle

Trace the circle, then draw your own:

Square

Trace the square, then draw your own:

Triangle

Trace the triangle, then draw your own:

Rectangle

Trace the rectangle, then draw your own:

Oval

Trace the oval, then draw your own:

Diamond

Trace the diamond, then draw your own:

Hexagon

Trace the hexagon, then draw your own:

Star

Trace the star, then draw your own:

Shape Hunt

Find these shapes around your home. Draw what you found:

1. Something shaped like a circle
2. Something shaped like a square
3. Something shaped like a triangle
4. Something shaped like a rectangle
