

Number Bonds Worksheets

Understand part-part-whole relationships • Ages 4–6

For Parents

- Number bonds show how a number can be broken into two parts.
- Start with small numbers (bonds of 5) before moving to bonds of 10.
- Use objects like blocks or counters to model each bond.
- The top circle holds the whole number; bottom circles hold the parts.
- Practice saying: "3 and 2 make 5" or "5 is made of 3 and 2."

Bonds of 5

Example: Number Bond

$$5 = 3 + 2 \quad (\text{The whole is 5, the parts are 3 and 2})$$

Fill in the missing number in each bond:

Bonds of 10

Complete each number bond so the parts add up to 10:

Number Bond Practice

Write the addition sentence for each number bond:

1. 5 is made of 2 and ____.
2. 10 is made of ____ and 4.
3. 7 is made of 3 and ____.
4. 8 is made of ____ and 5.
5. 6 is made of 1 and ____.
6. 9 is made of 4 and ____.
7. 10 is made of 8 and ____.
8. 7 is made of ____ and 7.

Draw Your Own Number Bonds

Choose a number from 3 to 10. Draw all the ways to break it into two parts:
